- [1.1-Chimay]

Release info**Announcement date:** Mon, 05/11/2012

Document the usages of ChangeMan ZMF's STUB panel, which will be shown it you type primary command S on ChangeMan ZMF's primary option menu (and you've been authorized to use it).

Here are already a few cases where this may come in handy:

- **Submit** any (repeast any) job with the authority of the ChangeMan ZMF started task.
- Apply changes to ChangeMan ZMF's **internal scheduler** data.

Note: This STUB panel is also mentioned (briefly) in a reply from SERENA to a question about **hidden panels and/or panel options**.

Reminder: if you're in a hurry (anxious) to get Dr.Chgman to deliver it faster, consider contributing via the Z-Bounties program.
