Website design

- [Website]

This website was developed (and is maintained) by In Petto, using a content management system (CMS) named Drupal.

Apart from developing websites, In Petto also offers solutions and services such as:

- Internet security using digital certificates.
- Optimalize websites in the context of moving up in the ranking in search engines such as google, etc.
- Software escrow, which is depositing source code of all sorts of software programs and which protects users of proprietary (compiled) software against a software vendor going out of business because of (e.g.) bankruptcy (a modern equivalent of what used to be done in the past via a traditional notary office using floppy disks and/or CD ROMs).

More infomation about such CMS and/or about In Petto is available on the In Petto website.
