# Z-Audit

- [Z-Audit] |
- [ZMF Administrator] |
- [Helpdesk operator] |
- [Release manager] |
- [IT Auditor] |
- [Z-Consults Roadmap]

Z-Audit is a set of ChangeMan ZMF related remote consultancy services that addresses topics related to areas like:

- Redundancy
- Performance
- Integrity
- Implementation

Because of the so many ChangeMan ZMF implementations we have been involved in, we know what kind of things can go wrong. Checkout Keeping ChangeMan ZMF environments in perfect shape for one of our typical presentations at a global SERENA xChange conference about this subject.

The Z-Audit services are typically performed remotely, where we either have a remote connection to the ChangeMan ZMF site(s). In certain cases we can also start from a copy from the ChangeMan ZMF site to be audited, and do the audit on our own infrastructure.

Often we also use the power of some of our AbitMORE SCM add-on products for ChangeMan ZMF, like AbitMORE SCM Reporting and AbitMORE SCM Commander. For that the customer does not need a software license to complete most of the Z-Audit. However once the customer experiences the results we achieved, they may want to consider licensing these add-on products also (e.g. to prevent similar issues in the future). For an illustration of some (there are more!) of the issues that get addressed, checkout Issues in nearly any ChangeMan ZMF environment.

If the customer wants us to do so, we can also help in fixing the issues discovered during a Z-Audit, via our Z-Tuning offering.
