- [Z-Consults Roadmap]

Z-Tuning is a set of ChangeMan ZMF related remote consultancy services to resolve issues discovered during a Z-Audit.

Because of the so many ChangeMan ZMF implementations we have been involved in, we know what kind of things can go wrong (and which we typically verify during a Z-Audit). But more importantly we also know how to resolve many of these issues, and how to prevent them from happening again in the future.The Z-Tuning services are typically performed remotely, where we use a remote connection to the ChangeMan ZMF site(s).

Often we also use the power of some of our AbitMORE SCM add-on products for ChangeMan ZMF, such as AbitMORE SCM Reporting and AbitMORE SCM Commander. For that the customer does not need a software license to complete the Z-Tuning. However once the customer experiences the results we achieved, they may want to consider licensing these add-on products also (e.g. to prevent similar issues in the future).
