The ChangeMan ZMF solution is probably in here ...

The Z-Factory contains all sorts of in depth **documentation** and plug-and-play **software** for **ChangeMan ZMF**, which is not contained in standard ChangeMan ZMF. Everything originates from real world requirements, experiences, practices and needs in various ChangeMan ZMF implementations.

Exploring (navigating) and/or searching for content within the Z-Factory is facilitated in various ways, such as:

- Topics are organized (tagged) by Z-Factory [categories](#). Each topic (a specific [Z-Issue](#)) in any of these categories the information is [structured](#) via its related links, i.e. the [Z-Clue](#) and [Z-File](#) corresponding to the selected Z-Issue.
- Topics can be narrowed by down based on [target audience](#) so that only those topics are shown that are relevant to the selected target audience.

As an alternative, checkout the [Top 10 ChangeMan ZMF Customizations](#), which is one of our [typical presentations](#) at a global [SERENA xChange](#) conference.

This presentation contains a ranking and previews about many of the popular customizations, most of them have made it to the Z-Factory also.

It also contains some details about various techniques used to create such customizations.

To encourage development of [Z-Files](#) software by Dr.Chgman, you can also participate in the [Z-Bounties](#) program. Funders of Z-Bounties help us to enhance the Z-Files (and its related Z-Issues and

Z-Clues) in particular areas of interest to its users.

Last but not least, you may also want to checkout the [Z-Factory Roadmap](#), which will give you an idea of what we currently have in mind about additional Z-Factory topics for the near future.

To further explore the Z-Factory, consider checking out any of these topics:
