Perform powerful CMN/ZMF operations from a single ISPF panel

The ChangeMan ZMF dialog contains a lot of (ISPF) panels. They facilitate retrieving lots of data from ChangeMan ZMF, by using appropriate query panels such as:

- query package.
- query component.
- query logfiles.
- browse components.
- etc.

The Z-Apps category therefor covers all sorts of power functions, mostly XML based, that simplify the usage of all such panels to operations that can be issued from a single ISPF panel.

Using these power functions will give you a tremendous productivity boost as compared to using the standard ChangeMan ZMF ISPF dialog. And via Z-Apps On Demand any of the Z-Apps can be tailored to perfectly fit your needs.

Below is a list of all available topics (Z-Issues) that fit into this category, with more upcoming topics
