Learning is the process of acquiring knowledge or skill through study, experience or teaching. It is a process that depends on experience and leads to changes in behavior. By learning about a common approach to implementing and using ChangeMan ZMF individuals can contribute effectively to ongoing improvement programs.

The Z-University is the place to be for various flavors of ChangeMan ZMF related training. Some of the available training topics are:

- ChangeMan ZMF User Training, for ChangeMan ZMF users that are not (or not yet) ChangeMan ZMF administrators.
- ChangeMan ZMF Administration Training, i.e. global administration and application administration.
- XML training for ChangeMan ZMF.

Exploring (navigating) and/or searching for content within the Z-University section is facilitated in various ways, such as:

- Topics are organized (tagged) by Z-University categories.
- Topics can be narrowed by down based on target audience so that only those topics are shown that are relevant to the selected target audience.

Checkout the list of available training courses below. You may also want to checkout the Z-University Roadmap, which will give you an idea of what we currently have in mind about additional Z-University topics for the near future.
