Applicable ChangeMan ZMF: Any ChangeMan ZMF release

After completing the previous lessons in this course, it will be clear that the XML services in ChangeMan ZMF are an extremely powerful set of functions. But it will also be clear that there are quite a few challenges (missing features, etc) to use these XML services successfully.This lesson explains and demonstrates some AbitMORE SCM products that address these challenges.

Agenda

- AbitMORE SCM Commander, an add-on product for ChangeMan ZMF's XML services.
- AbitMORE SCM Reporting, an alternative for ChangeMan ZMF reporting without using any XML services.
