Sometimes you can achieve amazing results in using vanilla features, simply by using these features in a special way (that the ChangeMan ZMF developers may not even have thought about when designing / developing ChangeMan ZMF).

Even though it may take quite a few steps to achieve the desired results, it simply works great. It's just a matter of understanding and executing all the required steps. Documenting those steps via *instructions that show how to prepare or make something* (and including the exact order of these steps), is the main purpose of this **Z-Recipes** section.

Below is a list of all the topics that fit into this category (limited to just 1 item if you did not register yet or if you did not login yet). To get an overview of future topics that fit into this category, please checkout the Z-Wiki roadmap. If you have other topics that you think fit into this section, please let us know!
