Sometimes you can achieve amazing results in using vanilla features, simply by using these features in a special way (that the ChangeMan ZMF developers may not even have thought about when designing / developing ChangeMan ZMF).

Even though it may take quite a few steps to achieve the desired results, it simply works great. It's just a matter of understanding and executing all the required steps. Documenting those steps via instructions that show how to prepare or make something (and including the exact order of these steps), is the main purpose of this **Z-Recipes** section.

Below is a list of all the topics that fit into this category (limited to just 1 item if you did not <u>register</u> yet or if you did not <u>login</u> yet). To get an overview of future topics that fit into this category, please checkout the <u>Z-Wiki roadmap</u>. If you have other topics that you think fit into this section, please <u>let us know!</u>
